

RFQ#: TV10 24/7 BROADCAST INTERFACE

FOR: TV10 24/7 Broadcast Interface

November 18, 2010

PROPOSED SOLUTION:

Weather Metrics will provide a fully-automated “channel in a box” solution to create a turn-key local news, weather and information channel for TV10. Weather Metrics will work with TV10’s staff to help create an aesthetically pleasing broadcast look with custom TV10 graphics and branding. The solution provides a web-based secure login to change content. Content changes can be made by the City of Charlottesville staff or by Weather Metrics technicians. The Weather Metrics support team will help maintain the channel and can help implement any requested changes.

The Weather Metrics solution will provide a system capable of squeezing back an existing video feed in the main video window or of populating the main video window with recorded video clips or a slide show. The system can be scheduled to automatically switch between these different sources of content in the squeeze back window.

The Weather Metrics solution will provide National Weather Service data feeds, to provide live and forecast conditions from the Charlottesville viewing area. The forecast data can be presented in a “7-Day” or “5-Day” graphical format in a window on the screen. The system can also display live weather conditions from the Charlottesville area and surrounding cities.

The system will alert viewers of Emergency Alerts issued by the National Weather Service or other Government Agencies via the Government provided CAP feed. The system can run a special crawl to alert viewers of the emergency. In addition to showing alerts in the ticker, other types of information can be displayed when an alert is not present, such as community information.

Additionally, the system has the capability to ingest a wide variety of information from the City of Charlottesville website and other data sources into the crawl or other graphical zones, such as a community calendar.

Weather Metrics will provide shipping, training, and support to create a reliable solution that will keep the channel running with little need for regular maintenance.

ADDENDUM 1

24x7 Weather.Net™ Subscription Agreement

1. "CUSTOMER" agrees that if it or its assets are sold in any manner whatsoever, this Contract shall remain the obligation of "CUSTOMER" and any party purchasing "CUSTOMER'S" assets will be required to succeed to and be bound by the terms and conditions of this Contract. Any such succession shall not, without the consent of "SELLER", relieve "CUSTOMER" of liability hereunder.
2. "SELLER" agrees that "CUSTOMER" may elect not to use the "24x7 Weather.Net™" trademark in connection with its use of the System, but must in so doing, acknowledge "SELLER" as the developer of the System and holder of all proprietary rights to the System by displaying the Weather Metrics name and trademark on all on-air displays and referencing the system. If "CUSTOMER" elects not to use the "24x7 Weather.Net™" trademark, but instead separately operates the System under another name, whether or not trademarked, "CUSTOMER" agrees that "SELLER" has the right, as long as an active contract is in force plus an additional three year period, to use the particular name trademarked and utilized by "CUSTOMER" in connection with its use of the System in connection with all of its future advertising and sales.
3. "SELLER" agrees to deliver the equipment the "CUSTOMER" purchased hereunder in stages as follows: computer system, video card, computer software, and training on the System and up to two weather stations, if purchased, upon initial delivery.
4. This agreement shall remain in force and "CUSTOMER" retains the rights to the 24x7 Weather.Net™ System™ upon the change over to the Digital Domain at the time of such occurrence, if such occurrence is during the term of this agreement.
5. Information and data generated by the 24x7 Weather.Net™ system is for the exclusive use by the 24x7 Weather.Net™ system and may not be used for other purposes without the written consent of "SELLER".
6. "CUSTOMER" will hold harmless the "SELLER" and be responsible for receiving permission to use, as deemed necessary by the "CUSTOMER", any and all data that will be displayed, integrated, or used with the 24x7 Weather.Net™ system, including but not limited to, raw weather data, video files, data supplied by other computer systems, data supplied by WSI, Weather Central, ADC Radar, Barons Radar, Barons Weather Net products, Automated Weather Source (AWS), AccuWeather and Meteorologix.
7. 24x7 Weather.Net™ is designed as a content management system. "CUSTOMER" is responsible for obtaining the rights, permissions, licenses for any and all data that "CUSTOMER" will be processing and utilizing in conjunction with the 24x7 Weather.Net™ system. "SELLER" is not providing any content, unless expressly outlined in this agreement, and shall be held harmless by "CUSTOMER" in any action arising from the use or misuse by "CUSTOMER" of the content being utilized by the 24x7 Weather.Net™ system.
